

got compliance?

Today's Petroleum Storage Facilities are subject to a wide variety of compliance regulations that demand enormous amount of efforts to be fulfilled.

Senate Bill 989 (SB 989) for example, requires that all secondary containment systems must be tested upon installation, 6 months after installation, and every 36 months thereafter.

Secondary containment systems covered by SB 989 are:

- Double wall tank annular space (if not hydrostatically monitored)
- Secondary containment of piping systems
- Any tank sump required by regulation
- Under dispenser containment

At Western Pump we perform SB 989 sump test with the INCON STS system.

Sumps are cleaned of debris and pressure-washed before testing. Any minor repairs (i.e. Loose entry boots, clamps, etc.) necessary to facilitate a successful test are made.

After the testing is complete, test fluids are filtered and returned to our trailer mounted tank for reuse on the next test. This minimizes any disposal costs for our customers.

Tank and piping annulus testing is done according to manufacturers recommended practices.

Finally, we provide a written report of the test results with any recommendations for needed repairs.

In addition to SB 989 testing, we offer a full range of compliance testing and certification services:

- Designated Underground Storage Tank Operator (DUSTO)
- Annual Leak Detection Certification
- Precision Tank and Leak Testing
- APCD & AQMD Testing

What else can we do for you?

Western Pump is a full-line wholesale petroleum equipment distributor. We offer parts and equipment sales to Oil Companies, Dealers, Contractors, Fleet Owners, and Maintenance Facilities throughout California, Arizona, and Nevada.

We are also a licensed general contractor specializing in the construction of retail service Stations, fleet fueling facilities, convenience stores, and automotive maintenance facilities. Projects ranging from simple tank removals through major remodeling projects and ground up constructions are our specialty.

If you would like any additional information or price quotations for specific projects, please call any time.
